

Inaugural Bull Sale

TUESDAY 9TH AUGUST 2022

**ON-PROPERTY & ONLINE
“CAMILAROI WEST”, CONDAMINE QLD**

**60 | ANGUS &
BRANGUS BULLS**

Welcome

We invite you to join us for our very first on-property bull sale on Tuesday 9th August at "Camilaroi West", Condamine. It is with excitement and gratitude we reach this milestone, and we are looking forward to offering 61 Angus and Brangus bulls on sale day.

For the past 17 years we have been heavily involved with the Sandon Glenoch Angus sale, and while we are very appreciative of this opportunity, the logistics and management of our bulls pre-sale and post-sale was going to become more cumbersome with the increased numbers of our own JK bulls. So we have 'bitten the bullet', prepared a site, and we have been building what will hopefully be a facility to easily select and purchase the bulls on offer.

The sale venue will be at "Camilaroi West", located about 4km north of Condamine on Henry's Road. We purchased this property at the beginning of 2019, and at the time it was 90% farmed with very minimal livestock infrastructure. We are still farming around 60% with fodder crops, and have improved the remaining land with a diversity of grasses and legumes. We started structural improvements this year, and while we are grateful for the rain, the prolonged wet weather has posed its challenges with laying poly, fencing, and building the yards, roads and shed.

On offer on sale day will be 42 Angus and 19 Brangus bulls, including 10 yearling bulls (five Angus and five Brangus).

Within the Angus bulls, a feature for this year's sale will be 14 sons of Sugarloaf Harvester N174. We purchased him in 2019 for \$44,000 and he was the 10th highest selling Angus bull in Australia that year. N174 is a little different type to most Angus sires, offering a huge amount of length, genuine muscle expression, and therefore weight. Combined with this, he is very quiet and good footed, and has real sire appeal. Harvester also offers some outcross genetics for our herd. His sire sold for US\$275,000 at the SAV sale.

Glenoch Kallangur K112 again features, with 13 sons and four grandsons. We purchased K112 in 2016, and he has been such a great sire for us who consistently improves on every cow we put him over. His best attribute is his muscle expression with softness, and it is so evident when nutrition starts to wane in the paddock and his progeny keep their weight and shape. He's quiet and very good footed, and has proved himself as a sire in the paddock. There are many Angus sires that can't match him for growth, days to calving, scrotal, carcass weight, EMA, fat and marbling.

Also a feature in the Angus are the seven sons by Karoo Docklands N107, who was the top priced bull we purchased at the 2019 Karoo Angus Bull Sale. N107 is a proven calving ease sire, very slick coated, good footed, with a balanced blend of traits elsewhere.

We are very excited with our Brangus program and the fundamentals in general for Brangus in Australia. By combining the environmental adaptability traits of just enough Brahman content and all the desirable traits Angus are so well known for, there really is a great future for the breed.

Admittedly, meeting the JK Brangus criteria is easier said than done, and after nearly 20 years trialling, culling and retaining, we are really happy with the depth within our Brangus herd that is taking shape. Stacking those great functional and fertile cows within pedigrees, performance recording and breeding to a type we feel the market desires.

We are very proud to offer you these 19 Brangus bulls, some you would describe as more of an Ultrablack, but we just call them all Brangus. A feature sire is Bimbadeen Picus P108, with 13 sons. He has crossed so well over F707 and Lamont daughters, adding softness without losing the muscle expression. He is a very balanced bull, very good footed and very quiet. He's a goer in the paddock and doesn't mind trying to find a few more cows.

Nindoooinbah F707 has one son and nine grandsons and this will be the last opportunity to buy a direct son - he is a cracker and epitomises all the great traits F707 has contributed. F707 is breed-leading for eye muscle area, fast growth, and diligently worked in the paddock until he was nine years old.

Triple B Lamont L594 has two sons and three grandsons, and is a bull that has always held his condition - if environmental adaptability had an EBV, he would be a trait leader. He is a proven calving ease sire, quiet and very good footed.

We are offering 10 yearling bulls, and with the exception of one Brangus, all of the yearlings are suited for maiden heifer joinings. For some time we have been privately selling yearlings from September/October onwards, and increasingly it has been difficult to work out who gets first pick. So we have decided to put our pick of the yearlings (suited for maiden heifers) in this sale.

We have been using yearlings over heifers and cows for as long as we can remember, and ideally we like to have them at least 500kg before putting them to work, particularly for cows. The advantages of buying yearlings include that they integrate more easily with older bulls during off season, there is less weight for a cycling heifer to hold up, and they slowly grow to the environment they are in. They do need to be regularly checked when out with females, and we recommend you don't put them out with as many females as what you would with an older bull. Ideally it would be best if they are first joined to heifers on a good quality nutrition. However, other people have had really good results in quite extensive areas, in a join all year type scenario, and also in with the older bulls.

With any new bulls purchased of any age, we recommend drawing on what has worked for you in the past, monitoring the bull's wellbeing, and deciding on a method that works best for your environment and production system. In the sale catalogue we will provide more information on taking your new bull home.

Thank you so much for your time and consideration of our bulls this year, and we look forward to the opportunity to welcome you to our first sale. Please don't hesitate to contact us if you would like to organise an inspection of the bulls prior to sale day, or have any questions we can help you with.

Behind the Brand

We have been breeding bulls and developing our seedstock herd for over 15 years. During this time we have strived for consistency and depth of quality in our bulls, with a focus on fertility, performance, adaptability and customer satisfaction.

We breed with a balanced approach across all traits, and commercial relevance is at the heart of our seedstock and commercial programs, comprised of 650 breeding females.

As always, all bulls in the sale will be:

- ✓ Registered with their relevant breed society
- ✓ Breedplan performance recorded with genomics
- ✓ DNA sire verified
- ✓ Semen motility and morphology tested
- ✓ Independently structurally assessed
- ✓ Blooded for tick fever
- ✓ Tested free of pestivirus
- ✓ Vaccinated for 7 in 1, 3 day and vibrio
- ✓ Dam fertility data is provided on all bulls (number of calves and average calving interval)
- ✓ Online bidding is available, and comments and photos and videos are provided for every bull.
